Pro-face Product Guide 2025

By connecting to devices from a plethora of manufacturers,
we can discover new optimized IoT solutions and
configurations with peace of mind on the site.

proface.com

Pro-faceTM
by Schneider Electric

What is Pro-face

Pro-face revolutionized how humans interact with machines, heralding a new era of industrial automation by developing the world's first programmable graphic terminal.

We have provided industry standards in Human Machine Interface technology since its inception.

Pro-face's pioneering spirit extends far beyond the first HMI creation. We continuously push the boundaries of what's possible in human-machine interaction, introducing innovative features, intuitive interfaces, and advanced functionality.

We trust customer satisfaction is of utmost importance. Our HMI expert team is always ready to provide technical assistance, comprehensive training, and guidance throughout your automation journey.

Experience the transformative impact that Pro-face brings to your industrial automation endeavors.

[Pro-face Brand History Video](#)

Watch the Video

What is HMI?

Reposition the human in the center of the automation architecture. Interactive and intuitive operations help to make sharp and timely decisions by everyone - everywhere.

Optimized IoT solutions with Pro-face

Pro-face HMIs empower workers by seamlessly integrating OT and IT and serving as a gateway to higher-level systems. These IIoT-enabled HMIs not only control equipment but also collect and display data, share critical production information, and send alerts. This ensures proactive maintenance, maximizes uptime and boosts productivity by quickly identifying and resolving issues.

Sustainability - EcoDesign

EcoDesign is a systematic approach which considers environmental aspects in the design and development process with the aim to reduce adverse environmental impacts throughout the life cycle of a product.

Energy Efficiency

Lower power consumption versus normal operation by reviewing component and design (GP6000 Standard & Advanced).

Higher reduction can be achieved when using backlight mode off (GP6000 Standard & Advanced, PSA6000).

Green Material

To help reduce our carbon footprint, Pro-face uses eco-friendly materials like low-carbon aluminum and bio-plastics in its products.

Sustainable Packaging

New packaging is made from 100% recycled cardboard with at least 70% recycled content. Single-use plastic has been significantly reduced.

Life-Time Extension

Access to local repair center and regular maintenance services (depending on offers and countries)

Additional resources

End of Life instruction for easy disposal, REACH and RoHS compliant, Environmental Data Program available on proface.com

Cybersecure

Security is at the core of our digital transformation and essential business imperative for us, our ecosystem and industry at large.

We enforce digital, operation, and physical security fundamentals

We raise the bar on cyber defense, threat intelligence, and incident or crisis response

We take an enterprise-wide risk-based approach

We build trust along the supply chain, and with the installed base

We meet customer and authority expectations

Secure Remote Access

Pro-face Connect Offers an encrypted communication and can centrally manage users with different access levels. Pro-face connect product undergoes third-party audit assessments to demonstrate compliance under IEC62443 standards

Secure Element

Prevent any potential leakage of confidential information

Use a Secure Element to store cryptographic data and restore to the factory image for secure disposal to prevent leakage of confidential information.(GP6000 Standard & Advanced, PSA6000)

Secure Boot

Prevent unauthorized or malicious code from compromising the HMI's integrity

The robust protection mechanism is essential for safeguarding critical industrial operations against potential cyber threats

Security Seal

Physical tamper resistance and detection

The Secure Seal aims to detect any unauthorized attempts to open the device's packaging(GP6000 Standard & Advanced, PSA6000)

High Flexibility

OT / IT
Connectivity

Scalable and
Customizable Solutions

Collaborative
System

Since factories rarely use only single maker's devices or a single network, it is essential for HMI to connect to various devices and networks. Pro-face's rich protocol compatibility satisfies this need and enables a thorough collection of device data. Pro-face HMI flexibly connects the latest high-performance robots, visualization devices, and PLCs, as well as networked equipment and systems and modified old facilities.

Simple Visibility

Intuitive
Layout Design

Increasing
Information Value

Modern
Visualization

As information increases, visualization becomes less simple because the operation screen fills up with information. That's why we must focus on providing necessary information at the right time, when needed, instead of visualizing everything. User-friendly screens are the key to improving productivity.

Strong Reliability

Robust and
cybersecure Solutions

Global Availability
/ Support / Training

Effortless migration
to innovations

While user friendliness is important, we must never forget the importance of high reliability in industrial equipment. We continue our efforts to ensure long-term peace of mind in any manufacturing setting. This includes conducting thorough evaluation tests and adopting strict security measures to help realize smart factories. We can support tomorrow's manufacturing with HMI Centric Solutions.

Virtual Showroom

Unique online experience that allows you to explore and interact with our latest products and solutions from the comfort of your place.

Customization and Services

High Flexibility

Offer Scalable and Customizable

We provide a range of useful services for our customers. If the services not stated in the list below are needed, we'll make every effort. For details, please contact your local Pro-face sales representative.

Customer Story

Why choose Pro-face

Industrial Panel PC PS6000

FDA

IRM manufactures tablet presses, capsule filling machines, and granulation equipment for pharmaceutical, nutraceutical, and aligned industries.

Background and Challenges (IRM Enterprises)

Pharmaceutical companies are becoming more demanding as they expand and enter regulated markets like USFDA, UK MHRA, and EU GMP. They want the machines to be 21 CFR Part 11 compliant, which was impossible with the HMI + PLC because this system requires more reliable hardware and software. Hence, the need for IPC (Windows) + Lite SCADA (BLUE Open Studio) + their application.

A wide range of displays with multi-touch operation, and supports various configuration options

A very robust terminal, which can handle multi-tasking, take multiple loads.

Support is excellent, with prompt and responsive service.

Advanced HMI SP5000X

Outdoor

Kawasaki Kiko Co., Ltd., a comprehensive manufacturer of tea production and harvesting machines with the top market share in this field, successfully implemented a next-generation project.

Background and Challenges (Kawasaki Kiko)

Next-generation machines must be more efficient and autonomous. In the past, devices used microcontroller-integrated LCD screens. However, an HMI would be better suited for both control operations and display interfaces. Furthermore, the latest IoT makes use of the cloud, but incorporating such functionality in a machine running in fields would likely be a significant challenge.

Usual 3-year development time was reduced by 75% to around 1 year.

Operability improved by 200% through the use of a bright display and remote monitoring.

Maintenance efficiency increased by 30% through HMI specialist support.

Basic HMI ST6000

Food

Good Life Technologies Pvt. Ltd. was founded in 2007 and manufactures bakery machines. The company provides remote services for maintenance and support of these machines, leading to significant time and cost savings by eliminating the need to dispatch service staff.

Background and Challenges (IRM Enterprises)

When exporting manufactured machines, it was necessary to dispatch staff to provide services and support, which required significant time and financial resources.

Easy tag integration with PLC, and simple Internet connectivity enables remote access from the factory.

Pro-face, being a pioneer brand in HMI and cyber-secure solutions can be provided to customers around the world.

Aluminum front panel and highly customizable design with 16 million color variations.

Migration

Paper Machine

KAWANOEO ZOKI CO., LTD. has been manufacturing paper machines and paper processing machinery since its founding and boasts an 80% share of the domestic market for household tissue-making machines.

Effortless Migration and HMI updating

The equipment we develop is built for long-term use (typically 10 to 20 years)... but in some cases, the customer has a need to update the HMI, so it's essential that HMI migration is easy. Migration tools such as project converters, accessories, conversion cables, etc., are fully equipped and updated without any problems. Another point that makes it easy to migrate is the fact that both analog and matrix touch panel types can be selected and the operability of the equipment can be inherited and migrated. This is undoubtedly one of the reasons why we have continued to use Pro-face HMI since its introduction in 1992.

MANY MORE CUSTOMER STORIES! >>>

Use Case

Explore innovative use cases of Pro-face HMI solutions across various industries. Discover how our advanced technology enhances efficiency, safety, and productivity in real-world applications.

HMI Centric Architecture reduces engineering efforts.

HMI-Centric Architecture is the solution to challenges associated with designing and developing equipment, helping you save time and effort in system development. Difficult work made easy with Pro-face as your partner.

IT (Information Technology)

Design IT system architectures to quickly build secure and robust remote solutions.

New Experience

Highly Flexible HMI with Industrial Panel PC

Industrial Panel PC PS6000 Series is ideally suited for individuals seeking to design highly flexible HMIs. You can find the ultimate solution for your HMI design needs.

Easy IT Connectivity

Address various connectivity requests without programming

IT connectivity Connecting various OT devices

Barcode readers and cameras, and more

Improved machine operability

Machine UX undergoes a dramatic transformation by utilizing Windows applications

PDF Video Photo Browser

Storage capacity of more than 128 GB, providing peace of mind.

Quality and global support from HMI specialists

Designed in Japan by Pro-face HMI specialists, the PS6000 delivers a dependable PC-based architecture, supported by rigorous testing and simulation from early development.

Flexible configuration

A rich modular catalog makes it easy to configure and adapt the system to diverse requirements.

A New Experience for Automation and Machine Design Engineers

A rich modular catalog and a strong background of customization service. To run any software, including pre-installed bundles. Easily selected with new Product Configurator and with quick delivery.

Future of Manufacturing with AI Solutions

Solve Employee Safety Challenges with Industrial Panel PC and AI

Enhancing Employee safety

Ensuring the safety and health of workers by monitoring their condition and machinery status.

Visual monitoring and inspection

Monitor product status and automate visual inspection and analysis.

Boost Productivity Across Sites

Real-time site monitoring to optimize and streamline operations.

Use Case: Employee safety

Safety Compliance Issues

Accidents and injuries often occur when hazardous maintenance tasks are performed alone, yet data on such solo work is limited and typically only reviewed after incidents happen.

Enhancing Safety and Health with AI Camera + Industrial Panel PC

Use AI cameras to monitor worker compliance with safety rules. The system detects not only incidents but also unsafe behaviors and near-misses. Data-driven insights enable proactive improvements and foster a culture of continuous safety.

Solution

Notifications

Alert via speakers or tower lights if the rule is not followed.

Manager Alerts

Email notifications to managers for non-compliance.

HMI Control

Automatically lock HMI operations if the rule is not followed.

Data Collection

Accumulate and analyze non-compliance data.

Advanced HMI

The Power of Expandability

The Pro-face Advanced HMI is a high-performance HMI device designed to meet a wide range of industrial automation needs. It offers a variety of displays and boxes to suit different environments and applications. With its emphasis on expandability, the Advanced HMI provides flexibility for future system upgrades and customization. This makes it a versatile and adaptable solution for diverse industrial settings.

Use Cases - Advanced HMI Solution

The Pro-face Advanced HMI is a high-performance HMI device designed to meet a wide range of industrial automation needs. It offers a variety of displays and Modular Box and Expansion Module to suit different environments and applications. With its emphasis on expandability, the Advanced HMI provides flexibility for future system upgrades and customization. This makes it a versatile and adaptable solution for diverse industrial settings.

Modernization and Efficiency

Modernize and enhance machine efficiency with cutting-edge display features, including [high-performance](#) HMIs and easy troubleshooting with [guidance features](#).

Separate installation with USB Type-C

Designed for [harsh environments](#) (high vibration, high temperature, and high humidity), the separate installation with USB Type-C enables operations for large machinery, even at a distance from the controller.

Flexible and Scalable Design

Easily replace the display (same size only) or box to [minimize downtime](#) and [reduce maintenance costs](#). Optional expansion modules allow you to add functions or memory as needed — keeping initial costs low while enabling future upgrades.

Standard Model Features

Smart Migration

Modernize machines with minimum effort.

It's an easy upgrade with the same panel cut-out, display size, and interface configuration.

GP-Pro EX makes smart migration simple for your machine.

Smooth touch operation

Improvement in operability with performance improvement.

Significant performance improvement compared to GP-4000T, delivering a stress-free experience with smooth operation.

Situational awareness

Improved visibility for easier screen readability.

Dramatically enhanced screen clarity with 16 million colors, high resolution, and instantly accessible modern graphics.

Effective Maintenance

Remote Monitoring via PC, Tablet, or Smartphone

Monitor HMI status anytime, anywhere.

Access machine data remotely from your PC, tablet, or smartphone.

- Tablet / Smartphone
- PC
- Dedicated app (iOS / Android)
- Pro-face Connect

Pro-face Segmented Approach

Long-term reliability and peace of mind.

Specialized HMI for Nitrogen gas protection model (N2 model) -purged equipment, ensuring maximum explosion protection and operational cleanliness.

Why we use the Nitrogen gas protection model (N2 model) Model?

Getting Dark

Nitrogen gas protection model (N2 model) -purged explosion protection may cause screen dimming due to chemical reactions.

Overlay is Billowed

The front overlay may bulge due to the inner pressure, making operation difficult.

N₂

Our solution with GP6000 Segmented Offer

Mechanical modifications prevent Nitrogen gas protection model (N2 model) from entering the HMI housing.

A vent filter is used to equalize pressure and prevent overlay bulging.

Ensures Equipment is Safe to Use in Explosive Atmospheres.

Cross-Shaped Key Design for Smooth Navigation

Enhanced operability with a Cross-shaped Key design for improved navigation and operation.

Improved Operability

Empowering Function Keys

Improved operability with more function keys for enhanced user interaction.

Support Safety Operation

Clear Status Recognition

Illuminated Emergency Stop for Clear Status Recognition

Illuminated Emergency Stop Switch with good visibility for clear status recognition and improved safety.

Enhanced Operational Adaptability

Dual-Handed Flexibility

The handle design allows two hands for a secure grip or usability in tablet style with a one-handed grip.

Secure Operation

Designed with Helpful Switch Functionalities

A reliable and secure user experience with helpful switch functionalities.

More Robust

Environment Resistance

Wide Operating Temperature Range

Wide operating temperature range for increased adaptability in various environments.

Remarkable Durability

Robust Housing and Non-Ledge Connector

A cable is designed to withstand shocks and bends, providing durability and performance.

Secure Hanging Solution

Wall Mounting and Magnet Support

A user-friendly mounting adapter provides fast placement, easy setup, and peace of mind.

Adapter (With Wired Adapter)

Direct (Without Wired Adapter)

Advanced (Modular HMI)

SP5000 Series

GP-ProEX

Flagship model achieving high performance and robust network security

The SP5000 series is an HMI that provides information quickly and efficiently, and promotes "smartification" of your factories.

Size	19" Wide	15" Wide	12" Wide	10" Wide	7" Wide	15"	12"	10"
I/F	COM	LAN	USB	SD	CFast	DVI-D		

Performance

Module Configuration

SP5000's module structure makes it easy to change display size according to customer demands. No configuration changes to the project file are required, and display boxes can be easily converted. Premium Display also supports automatic screen scaling.

Improve Maintenance efficiency

Modular construction and storage mounts included for the main unit make maintenance easy to perform with SP5000 in a short amount of time. For example, by replacing the display unit alone or just the box, you can eliminate the costs for spare parts.

Network segmentation

All displays of SP5000 series have two Ethernet I/F ports as standard. The IP address is changed on the SP5000 at delivery.

Advanced (Outdoor HMI)

SP5000X Series

GP-ProEX

An outdoor HMI that is visible in sunlight and withstands extreme environments

SP5000X is suitable for multiple applications under harsh environmental conditions including use in special purpose vehicles such as firetrucks and construction equipment; parking lots and gas stations; and the oil and gas industry.

Size	15" Wide	12" Wide	7" Wide	
I/F	COM	LAN	USB	SD

Extreme

Sunlight Readable

No plastic overlay

High brightness liquid crystal panel
High brightness liquid crystal panel (1000cd/m²)

Anti-reflection (Anti-glare)
Improve visibility in sunlight by decreasing glare.

High-transmittance design
The LCD uses a glass touchscreen to improve light transmittance.

Robustness

UV Protection

UV protection is improved by replacing plastic parts exposed to sunlight with metal or glass, reducing deterioration.

Cut UV rays by 99% (380nm)

Environmental Resistance

Vibration and Shock Resistance

We do apply IEC60068-2-6 or IEC60068-2-27 in stead of IEC61131-2 test which is typically used for factory automation devices. Because they are more suitable for earth moving machines, or generators or compressors which use engines to operate machines.

* Display Module : 7" w and 12" w: 2G / 40G, 15" w: 1G / 15G
Box Module : follow the connected Display Module.

Operating temperature: -30°C to 70°C

Can be used in harsher environments without the need for anti-frost heaters or fans and cooling systems.

* Display Module : 7" w: -30 to 65°C, 12" w: -30 to 70°C, 15" w: -20 to 60°C
Box Module : follow the connected Display Module.

Dust and waterproof

Compatible with IP66F, IP67F, Type 4X Rated for indoor and outdoor use in harsh environmental conditions.

*1 If the unit is powered off for 100+ days, the optional item must be mounted to retain RTC (clock) data.

The background of the entire page is a blue-tinted industrial scene. It shows a worker in a white lab coat interacting with a large piece of machinery. The machinery has a control panel with a small screen and several buttons. In the foreground, there's a complex assembly line with various mechanical parts and components. Overlaid on this scene is a white network diagram consisting of numerous nodes connected by lines, resembling a web or a data network.

Basic HMI

Efficiency and Simplicity
at Your Fingertips

Pro-face Basic HMI offers a streamlined design and essential functions, making it a cost-effective solution for basic industrial applications. It combines intuitive visualization with clean aesthetics—ideal for simple machine operations. To meet evolving needs, the Basic HMI also supports IIoT integration and enhanced cybersecurity, helping you stay connected and secure.

Basic HMI (Standard)

ST6000 Series

BLUE

GP-ProEX

Achieve advanced visualization with the new-generation Basic HMI

The ST6000 Series redefines Basic HMI with a level of visualization unmatched by conventional models.

New Visualization

Wide	Size	15" Wide	12" Wide	10" Wide	7" Wide	10.4"	5.7"	I/F	COM	LAN	USB
4:3	Size	10.4"	5.7"	I/F	COM	LAN	USB	SD			

Refined

An innovative HMI with a sophisticated design that transforms simple machines.

16 Million Colors

Achieve the previously unimaginable and bring displays to life with 16 million colors.

Attractive aesthetics

The sleek metal frame adds a premium touch—ideal for machines where design matters.

Better Graphics and Font

Display beautiful fonts with anti-aliasing. Customize gradation and transparency to meet your needs.

*only BLUE supports

Simple & Easy

The simple design and interface help increase productivity and efficiency.

Easy Migration **GP-ProEX**

Panel cut-out compatibility

Easily reuse existing project data thanks to shared GP-Pro EX software.

Minimum modification to install new HMI (Compatible Interface)

Connected & Secured

Seamless and secure connectivity with a wide range of devices — enhancing flexibility and system value.

STM6000 Series

BLUE

GP-ProEX

Optimize operations and machine information.

STM6000 can be installed quickly without tools using a unique push-button system through a 22 mm circular hole.

Installation

Size	7" Wide	4" Wide	
I/F	COM	LAN	USB

Easy & Fast Installation

No tools required — the push-button mechanism enables fast and easy installation via a 22 mm circular cutout.

Flexible Installation

Thanks to its modular design, the product can be separated for specific applications (e.g. limited space, heat, or vibration). Cable accessories (3m, 5m, 10m) allow the display to be mounted on a panel door and the rear module on a DIN rail using a dock station adapter.

Easy Maintenance

Front and rear modules can be replaced individually for easier maintenance.

STW6000 Series

Many industrial devices support HTML5, enabling display on PCs, tablets, and smartphones. As a Web HMI, the STW6000 easily displays HTML5 content from multiple devices. With its superior display quality, easy maintenance, and robust design, it's the ideal solution for smart machine visualization in factory environments.

Size	15" Wide	12" Wide	10" Wide	7" Wide	4" Wide
I/F	LAN	USB			

Ready to use, no application to download

The panel with HTML5 Browser function enables:
Swipe from the top of the screen to access the title bar and full navigation.
Access configuration menus for multiple servers and Web HMI settings.
Visualize all web content of any HTTP servers on industrial devices.

Secondary Cost-effective Display

A secondary display can show maintenance or diagnostic data directly from PLC servers or via the main display when equipped with an embedded server.

STC6000 Series

GP-ProEX

All-in-one solution for saving space and boosting engineering efficiency

A hybrid HMI with built-in control functionality. Combines PLC features and operator interface in one integrated software and hardware platform—maximizing space efficiency and engineering productivity.

Size	5.7"					
I/F	COM	LAN	USB	DIO	AIO	EtherNet/IP

efficiency

Connect your systems effortlessly and streamline your architecture with the STC6000

Say goodbye to complex setups and hello to simplified integration. Save valuable time and resources while achieving optimal performance.

 STC6000 Series 5.7" / VGA 262K colors	Sink / Source				
	Built-in I/O	DIO	Inputs : 16 Outputs : 16	High-Speed Counter / Pulse Catch Input •Single phase (4-point) •2 phase (1-point or 2-point)	Pulse / PWM Output 4-point
	Rear mounting	TM3	 TM3(Max 2 units)		
	Extension mounting	TM3	 Transmitter (TM3XTRA1) Receiver (TM3XREC1) TM3 (Max 8 units)		
	EtherNet/IP	EtherNet/IP Scanner	 TM3BC (Max 32 adapters)		
			3rd Party Devices (Max 32 adapters)		

Simple & Easy

Engineering Time Saver

Screens and logic programs can be edited with the same software, and the same addresses or user-defined control symbols can be shared for screen parts and logic elements with drag-and-drop operation.

Connected & Secured

The Power of Expandability

High connectivity with rich interfaces and user-friendly protocols allowing you to connect various devices with ease. Strong support for OT – IT integration and remote maintenance.

65 kHz Pulse Output (Standard feature)

Control the speed of a conveyor with a stepping motor.

Connect directly to a temperature controller via serial communication—eliminating the need for a PLC.

Cleaning machine

100 kHz High-Speed Counter (Standard feature)

Control an inverter using encoder signals with positional information.

Gather real-time production data with high precision.

Packing machine

Analog Input / Output (TM3 Module)

Use analog I/O and temperature inputs to control flow or tank temperature.

Even in compact spaces, interactive operation is enhanced via the touch panel.

Coolant Circulator

DIO Expansion Module (TM3 Module)

Expansion modules allow scalable I/O as the number of lockers increases.

Lock and unlock lockers easily with password-protected key inputs.

Delivery lockers

Basic HMI + Control/ 22mm Hole Mounting

LT4000M Series

GP-ProEX

Flexible installation using a circular hole or built-in I/O

Since launching the world's first display-integrated controller (CGP model) in 1996, we've earned a reputation for helping customers save space and reduce equipment costs.

Flexible

Size	5.7"	3.5"				
I/F	COM	LAN	USB	DIO	AIO	CANopen

Simple design without PLC

Connectivity with a range of devices.

Easy to create control panels

Easily retrofittable, requiring only 22φ circular mounting holes

Product Name	Length	Model No.
Display module	3m	PFXZXMADSM31
Rear module separation cable	5m	PFXZXMADSM51

Create systems with reduced wiring using remote I/O.

Supports the CANopen European standard.

Enables master-slave communication with compatible remote I/O units.

Compact HMI

GP4100 Series

GP-ProEX

Compact size. Full Pro-face performance

The compact GP4100 Series Color HMI combines high specifications, versatile software compatibility, and robust connectivity—now part of our expanding product lineup. Its display area is twice as large, with eight times the resolution of the monochrome model. Designed for the IoT era, it supports network-based data collection and remote device monitoring via tablet.

Size

4.3"

Compact

Small-sized HMI without compromising visibility or functionality

With a resolution of 480 x 272 pixels, information is finely displayed despite the limitations of space.

And more... **65,536** color display

Same panel cutout as monochrome model

Monochrome model(GP-410**)

Panel cut adapter
(Model:PFXZCFAD31)

Connectivity with a range of devices

This product allows you to collect data and monitor everything remotely using a tablet.

Entry HMI

Keeping the essential
with improved visualization

The ET6000 Series offers essential functionality and ensures easy migration thanks to software and hardware compatibility. Enhance your machine with practical features and solid performance based on the HMI Centric concept.

Entry HMI

ET6000 Series

GP-ProEX

Enough visualization

Entry HMI is designed for specific markets and focuses on machine visualization and operability, with more limited functionality than the Basic models. Please get in touch with your local Pro-face Office to confirm availability and support in your Country.

Size	15" Wide	12" Wide	10" Wide	7" Wide
I/F	COM	LAN	USB	

Good enough

Optimized Data Integration

Rich interface and various protocols support Pro-face connectivity.

Best-in-Class Visualization

High resolution & More color+Modern parts and right enough memory size for more images to create nice looking screens.

Operational Efficiency

Bigger screen has more capability to display more information

Reliability

Security checking at CPU level against basic intentional attacks

Partially coated against high humidity and dust as a standard

Efficient Maintenance

Achieve efficient maintenance and reduce downtime of the Machine.

GP-ViewerEX

Pro-face Remote HMI

Model No.	PFXET6400WAD	PFXET6500WAD	PFXET6600WAD	PFXET6700WAD

Touch Panel	Type : resistive film (analog) / Single touch / Service life : 1,000,000 times or more			
Interface	COM1 : RS-232C, COM2 : RS-422 / 485, Ethernet : IEEE802.3i / IEEE802.3u, 10BASE-T / 100BASE-TX × 1, USB : Type A × 1, micro-B × 1			
Memory	Application memory : 32MB Backup memory : 128KB	Application memory : 64MB Backup memory : 128KB		
Certifications	IP65, CE, UL, KC			IP65, Type 4X, CE, UL, KC
Ambient air temperature	0...50 °C (32...122 °F)			

Edge Box

Easy and efficient OT/IT connectivity
for diverse industrial needs

Pro-face Edge Box is a powerful solution designed to bring intelligence and connectivity to the edge of your industrial operations. It seamlessly integrates various industrial systems, allowing you to gather, visualize, and utilize data from multiple sources. Its compact and rugged box design ensures reliable performance in harsh industrial environments. Experience the power of edge computing with Pro-face Edge Box and unlock new possibilities for your industrial processes.

Edge Box

BLUE Open Studio

BLUE

GP-ProEX (WinGP)

Step Towards Smart Manufacturing

Pro-face Edge Box has industry-leading connectivity that enables collecting and utilizing data from various devices in various locations. Depending on your needs, you can choose the best-in-class data-collecting device from our wide range of lineups. Just add the Pro-face Edge Box; no need to change the current design. Let's start Smart Manufacturing with Pro-face Edge Box right now.

Software

Reducing application development time
and collecting data/monitoring
without any programming

Pro-face software products include HMI application creation, acquisition of a range of device information, and remote control and monitoring. In addition, software suitable for your application, such as SCADA software, can be used to analyze data.

Screen editor software

Versatile Visualization Made Easy

Revolutionary new software,
BLUE offers an alternative experience in HMI project design.
Anyone can easily create and change dynamic screens.

Intuitive Operation

Intuitive HMIs enhance efficiency and reduce errors. Their user-friendly design and real-time data visualization support quick decision-making and seamless integration in industrial automation.

Faster Decision-Making

with High quality graphics and Clearer fonts

Maximizing efficiency

with Combine multiple screens

Recognize Issues Early

with Highly flexible graph

Faster Engineering

An extensive library of pre-set samples, icons, and compound objects significantly reduces design time. This rich resource enables quick and efficient HMI creation, allowing you to focus on optimizing your industrial processes.

Secure

Ensures robust security through OPC UA certification. Pro-face Connect offers secure remote access with industry-leading encryption.

Create nice-looking HMI applications easily

HMI Design Studio is a web-based platform that lets you and your team effortlessly design and deploy attractive, high-function HMI screens for your projects.

Connected & Secured

Pro-face connectivity

Easily connect your devices using multiple standard interfaces, and bridge OT and IT systems through secure OPC UA protocol.

Remote Visualization (BLUE Web Viewer Runtime)

Monitor your equipment in real time from any PC, tablet, or smartphone using BLUE's Web Viewer. Access the right data at the right time — from anywhere.

Pro-face connectivity

Pro-face Connect is a cloud-based remote access solution that allows you to securely connect to ST6000 Series devices without complex programming or network configuration. Operate and monitor your machinery from anywhere — with full encryption and no IT involvement required.

Enhanced cybersecurity against basic intentional attacks

To enhance cybersecurity, all project downloads require admin authentication.

Sessions automatically log out after inactivity.

Security checks run at system boot, and Ethernet downloads are protected by IPSec and password encryption.

Supported Model

SP5000 Series / SP5000X Series / ST6000 Series / STM6000 Series / GP4100 Series / PS6000 Series / 3rd-party PC

USE CASE

Powerful Operation Terminal with **IPC PS6000 Series**

Provides reliable solutions for various industrial applications, ensuring that users can confidently leverage the power of Windows.

Powerful

- Expandability
- Efficiency
- Performance

Utilizing Windows

- 3rd party app

Simple Machine Operation Terminal with **Basic HMI ST6000 Series**

High-quality graphics and fonts, improving operability and user experience and enjoy secure remote access and enhanced cybersecurity features.

Refine

Intuitive Operation

Simple & Easy

Faster Engineering

Over **650** Ready-to-Use Parts Available

BLUE Line Management Lite SCADA Open Studio

FDA

21 CFR PART 11

Flexible software for your needs

Pro-face BLUE Open Studio is a development and runtime software that incorporates various tools users need to create SCADA HMI applications, dashboards and OEE interfaces.

Basic Features

Scripting	Animation	Recipes	Email (SMTP)
Security	Database	Multi-touch	FTP
Symbols	Events	Reports	Historical Performance
Tags Database	Graphics and Design Tools	Scalable	PDF Export
Troubleshooting	Trends	Scheduler	SSL Support for Emails
Gestures	Multi-Language	OPC	DDE Client
Alarms	ActiveX and .NET	Intellectual Property Protection	Custom Widgets

Connectivity

250+ available communication drivers for PLCs and many other devices.
Native OPC interfaces such as OPC UA/DA
Active X and .Net controls
Support upper connectivity to DB through MQTT.

Database

Connect to any SQL database (Microsoft SQL, MySQL, Sybase, Oracle), or Microsoft Access or Excel, and ERP/MES systems (including SAP), even from Windows Embedded Compact Edition. BLUE Open Studio is flexible, offering a built in interface that doesn't require knowledge of SQL for trends, alarms/events, grid and other objects.

OPC

BLUE Open Studio provides native OPC interfaces, such as OPC DA (Server/Client), OPC HDA(Server), UA (Server/Client) and OPC .NET 3.0 (Client). BLUE Open Studio also supports OPC XML.

Trends

Real-time and Historical trends, and SPC functionality are supported. Log data in binary format, or to any local or remote SQL database. Color or fill trends with graphic elements to enhance clarity of data. Date/ Time based or numeric (X/Y plot) trends give you the flexibility to display information that best suits your application.

Custom Widget

Custom Widgets provide the ability to integrate third-party web-based controls into the HMI/SCADA project screens. Develop and share a library of controls that can be easily integrated into an application and accessible through multiple platforms.

Historian

BLUE Open Studio includes support for saving historical data from some task worksheets to a Historian database or AVEVA Insight.

Import Wizard

PanelMate (Eaton and Cutler Hammer)
FactoryTalk View ME/SE (Rockwell)
PanelBuilder32SESSE (Rockwell)

Automatically
converting

BLUE Line Management Lite SCADA
Open Studio

Remote Access

Access your BLUE Open Studio Screen from any device with a browser that supports HTML5, such as iPads, iPhones, Android devices, Windows devices, and others.

Supported Model

PS6000 Series / STM6000 Edge Box HMI / 3rd-party PC

GP-ProEX

User friendly, yet powerful & DIGITAL

Enables HMI screen and logic programming for all. Screen creation can be performed with ease due to many functions that promote compatibility with legacy applications and reduce development time.

Save time and be more efficient

The included parts library offers advanced features without programming efforts. Leverage our HMI specialist technology to streamline project migration, enhance system security, and easily integrate information. With modular architecture, convenient parts and icons, and support for industry standards, you can focus on what matters most, ultimately saving time and boosting overall efficiency.

Increase connectivity and cybersecurity

OPC-UA Server ensures compatibility and scalability through standardized protocols, while Pro-face Connect provides the highest level of end-to-end security and encryption.

Operational efficiency and less unplanned downtime

Guidance Feature (PDF Viewer)

Efficiently guide operators through fast troubleshooting.

Real-Time Monitoring (Web Browser)

Efficiently monitor and evaluate workplace conditions via IP cameras, including areas that are not directly visible.

Easy Setting and Maintenance (Web Browser)

Access the built-in web server in controllers for setting changes, maintenance, and more.

Pro-ServerEX

Connect your machines to your IT environment for data sharing, unlocking new insights for improvements.

Supplying real-time data for visualization and analysis of production sites.

Remote machine monitoring and transfer of work instructions to increase efficiency between the production site and the office.

Site-wide networking for seamless data collection – no programming required

Collecting accurate information, and analyzing and utilizing all your data will lead to improvement in working processes!

Remote Access

Pro-face Remote HMI

Software that enables tablets and smartphones to display and operate the exact same screen as the on-site HMI. Secure design with full-feature functions taking into consideration tablet operations.

Supported OS	Android OS, iOS (iPhone, iPad, iPod touch)	Download (purchase) from App Store / Google Play
--------------	--	--

Pro-face Remote HMI Server

Installing Pro-face Remote HMI Server on a Windows device allows users to monitor and operate Excel and PDF files from Pro-face Remote HMI, in addition to the terminal operator screens.

Reference	Description
PFEXRHCLS	Software to operate and monitor Windows applications such as Excel or PDF besides Pro-face HMI screen

Pro-face Remote HMI Client for Win

More powerful Pro-face Remote HMI for Windows OS launched.

While inheriting the functions of Pro-face Remote HMI, newly improved functions were added.

Reference	Licenses	Description
PFEXRHCLS	1 License	Software for remote viewing of Pro-face HMI from desktop PC (license key code)
PFEXRHCLS10	10 Licenses	
PFEXRHCLS30	30 Licenses	

Pro-face Connect

Connect and Go

Pro-face Connect is a ready-to-use embedded HMI service to access machines remotely and securely.

Small initial cost

No need to install a VPN router at every branch.
Operation requires only a runtime license.

Use existing IP addresses without modification

Connect using existing local IP addresses without requiring changes or additional configuration.

Connect securely

Conforms with industry level standards for security.
Able to build a secure network.

- User access based on x.509 Cert.
- AES data encryption
- ISA99 and IEC 62443

FP6000 Series

Improve your machine's performance

Pro-face Flat Panel Monitors are industrial PC monitors with a touch panel mounted and offered solutions for difficult installation due to a harsh production-work site environment or limitation of space.

Size	22" Wide	19" Wide	15" Wide	12" Wide	10" Wide	15"	12"
I/F	DVI-D(Max 5m)						

Fits the most suitable place for machine operation by installing separately.

Industrial Flat Panel Monitors

DVI (video) USB (touch) : 5 M

PS6000 Series (Box PC)

Windows OS-installed PC (Only Windows 10)

Improve operation efficiency with a secondary display.

Industrial Flat Panel Monitors

DVI (video) USB (touch) : 5 M

PS6000 Series (Panel PC)

Model No.	Display Size	Resolution	Touch Panel Type	Touch Mode Configuration	Front USB
PFXFP6900WCD	22" wide	1,920 x 1,080 (Full HD)	Capacitive Multi-touch with optimized noise filter	Yes -Standard mode -Glove mode -Water detection mode	-
PFXFP6800WCD	19" wide				
PFXFP6700WCD	15" wide	1,366 x 768 (FWXGA)			
PFXFP6600WCD	12" wide	1,280 x 800 (WXGA)			
PFXFP6500WCD	10" wide	1,024 x 768(XGA)	Resistive multi-touch	Not applicable, because of a resistive analog touch panel	USB(Type A) × 1*1
PFXFP6700TMD	15"				
PFXFP6600TMD	12"				

*1 By default, the USB is disabled

EZ Series

Easily connect to HMI with USB solutions

EZ Series devices connect directly to HMIs via a USB cable.
They enable simple installation of components around the operating panel with no programming and minimal wiring.

Reduce excess inventory of indicator lights

EZ Tower Light

Model : PFXZCETWHA1(tube mounting with fixing plate)
Model : PFXZCETWW1(base mounting)

With this single model, multiple colors and sounds can be set. Capable of indicating the state of equipment.

LED lamps adaptable to various types of setting

Configuration from HMI 4 colors (red, green, blue, and yellow) and 3 modes (off, on, and blink)

Number of lamps: 3 Buzzer patterns: 4

Combining switch and lamp

EZ Illumination Switch

Model : PFXZCCEUSG1

Improve visibility with 6-color illumination. Reduce man-hours for control panel installation and wiring.

LED light switches accept a wide range of settings

Configuration by HMI design software 6 colors (red, green, blue, yellow, white, and orange) and 3 modes (off, on, and blink)

Protection structure: IP65 (front face where panel is embedded)

Mount: 22 circular mounting hole

Adding second LAN port with independent IP address

EZ LAN Adapter

Model : PFXZCGEUUE1

Adds a second Ethernet port via USB for dual IP address support on single-LAN devices.

· Same functions as built-in LAN port · 10BASE-T / 100BASE-TX · Limited to GP4000 standard models
